GROW KIT
READY-TO-GROW**
Available in multiple
varieties.

MUSHROOM GROW KIT MUSHBAG - MANUAL

EN The Mushbag contains a heat-treated substrate that's suitable for the spawn production of most edible mushrooms. It's equipped with a micro filter that allows it to breathe and a rubber injection port that seals the bag hermetically after injection with a spore syringe. Spores are not included in this grow kit but can be purchased separately.

.....
REQUIREMENTS: (torch) lighter, spore syringe
.....

1. CLEAN THE INJECTION PORT

Use the supplied alcohol swab to disinfect the injection port. Do not touch the port afterwards.

2. HEAT THE NEEDLE

Shake the spore syringe really well for 5-10 seconds for even distribution of the spores. Take off the protective cap and heat the needle of the syringe until it is red hot. Then let it cool for 15-20 seconds.

3. INJECT THE INOCULANT

Carefully insert the needle through the rubber patch and inject the contents of the syringe. If the flow blocks, gently pull the needle back a bit.

4. INCUBATE

Carefully squeeze the bag to distribute the spores. Put it in a warm, dark place (*). Make sure that the filter is free from the back of the bag. A temperature of 20°C is acceptable, but if possible,

aim for a temperature around 28°C. Lower temperatures can slow the growth process. Temperatures of 15°C and below will halt the growth of mycelium.

5. GROWTH

After about seven days, when the mycelium starts to grow, the bag will inflate a little. Shaking the bag now will accelerate growth. Once all kernels are covered with mycelium, the spawn is ready for use (**).

< END RESULT:

Bag of fullgrown spawn
.....

TIPS

(*) A good place to store the Mushbag would be the cupboard above the refrigerator. The heat produced by the refrigerator rises and increases the temperature by a few degrees. Heat pads can also be used, but never place the Mushbag directly onto a heat source – this causes the Mushbag to dry out. (**) If the Mushbag contaminates, it cannot be saved. Never open a contaminated Mushbag!
